

Information Security Policy

Method IT, established in 1997 as Strategic Networking Consulting Limited, serves as an independent IT solution provider. The company has grown rapidly with its founding majority shareholders remaining as directors in the business. Although initially concentrating on the finance industry, the company has greatly broadened its exposure to other professional service sectors, and these have become a significant contributor to growth.

The company is a vertically integrated specialist supplier of IT solutions, providing a high level of impartial professionalism from consultancy through implementation to support. Clients, therefore, have a single point of reference which ensures a high quality of service and the assurance that all issues will be immediately addressed.

Since assignments may require varying technological solutions, Method IT operates with highly skilled professional consultants. In this way, the necessary skill and experience for successful solutions is always available. Our personnel develop strong long-term working relationships with our clients.

Method IT comply with all aspects of the BS EN ISO27001 International Standard for Information Security, as well as other legal and applicable requirements. Management are committed to improve confidence within prospective customers and comply with all requirements of our existing client base and interested parties regarding the storage and management of confidential information.

The management of Method IT are fully committed to Information Security and have resolved to continually improve the ISMS using a number of internal top level and strategic objectives.

This Policy and the measurable objectives outlined above are continually reviewed for suitability at Management Review Meetings.
